

Newly updated, Version 2.0. The Study Kit V2.0 includes interactive programs which provide comprehensive training for individuals attending NDT courses.

Retention has been proven to be higher and learning quicker with the help of interactive CD training. Individual students using NDT Interactive Inc. products can enhance their knowledge in nondestructive testing field. Note that V2.0 also includes updated enhanced information, better graphics and animation.

Furthermore Version 2.0 now includes a course REFRESHER that reviews essential information received during your original course material and adds extra quizzes (including Apps) that ensure your knowledge is up to date.

This interactive training software is a valuable teaching tool for NDT personnel. Developed by NDT Interactive Inc., in cooperation with ASNT Inc. and CINDE of Canada, the Study Kit provides 100 typical SNT-TC-1A / CGSB certification questions in an interactive and stimulating learning environment (graphical and animated representations of the answers). This CD uses Question and Answer sessions to supplement the usual training programs and a reference to the required written material for detailed explanations. The questions provide coverage of all nondestructive topics techniques and equipment. The study kit has the ability to record, rate your progress and mark your examinations.

This software allows NDT training centers and organizations to conduct efficient and quality training in-house. The Study Kit is an interactive training concept which NDT Interactive Inc. wishes to promote as a future teaching tool for NDT personnel. System requirements: Windows Platform, System type: 32 bit and 64 bit operating systems are fully supported (Win 7, 8, 10).

This disk contains the actual program which is required for installation.(setup.exe). All sales are final.
